PROFESSIONAL SUMMARY

Industrial Engineer and **OEx Automation Analyst** at **Cabify** (ride-hailing, 40+ cities), specialising in **AI-powered automation** and **operational intelligence**. I design, build and deploy production-grade AI systems — conversational agents, computer-vision pipelines, ML forecasting and operational tools — working low-code-first (n8n) and through AI-assisted development (Claude API & Claude Code with Python/JavaScript). Strong ML foundations (Stanford & DeepLearning.AI); aerospace background at Collins. Trilingual FR/EN/ES, learning German — relocating to Berlin, September 2026.

PROFESSIONAL EXPERIENCE

Cabify

Nov 2025 – Present · Madrid, Spain (Hybrid)

Promoted twice in 8 months: **OEx Automation Analyst** · **Operational Excellence Analyst** · **Customer Operations Trainee**

- **Fleet audit system — AQM** (n8n + Claude Sonnet → hybrid ML + LLM): automated quality audits of Spain's fleet — **20,000+ vehicle images** analysed (vinyl type & condition, plate OCR, logo checks), **4,000+ vehicles** tracked in near real time; brought **~€470K/month** of previously unverified driver incentives under systematic verification; evolved into a two-tier engine (local CNN + OCR models trained on 16,000+ labelled images for deterministic checks, LLM escalation only for qualitative judgments) → **~80% lower AI cost**, personal data kept in-house (GDPR) — selected to present at **Cabify's quarterly company-wide All Hands**
- **WhatsApp B2C conversational booking agent** (n8n + Claude + Cabify API + Meta for Developers): end-to-end guest rides — QR scan → conversational booking → driver assignment → billing; live at a major stadium and an international airport; **71% conversion** from QR scan to ride request; Redis session memory, anti-fraud & blacklist controls, automatic Zendesk ticketing and PDF invoicing
- **AI Help Center chatbot** (n8n): **5,200+ interactions** in first month of deployment, **+90% self-resolved** without a human agent; auto-creates Zendesk tickets with full conversation context for escalations
- **B2B automation for corporate clients**: email-to-reservation pipeline — parses PDF work orders, geocodes stops and books rides via API with automatic driver assignment, replacing fully manual dispatch — plus a dedicated B2B WhatsApp booking line (corporate products, pricing and invoicing)
- **KPI forecasting** (Prophet + LightGBM + SARIMAX + Ensemble): **+58% accuracy** vs official estimates; **COPs Control Board**: 35 Tableau processes extracted weekly n8n → Lovable web app + Slack deviation alerts; city-events intelligence pipeline feeding demand planning
- **Cabify Product Hackathon 2026**: built Smart Fleet Manager in a 1-day team sprint (Lovable + ElevenLabs); live demo: cabify-lauria.lovable.app

Collins Aerospace

Jul – Sep 2025

Production & Logistics Engineering Intern · Getafe, Spain · On-site · Aerospace

- **Reduced inventory costs by 35%**: audited ERP discrepancies, calculated MIN/MAX levels and Reorder Points across production lines; **improved production efficiency by 15%** via Value Stream Mapping (VSM) and task-sequence optimisation; EH&S compliance → *Re-contacted with a full-time job offer months post-internship — Getafe site proactively reached out when a role became available*

TECHNICAL SKILLS

AI & Automation: n8n (advanced) · Claude (API, MCP) · AI Agents · Prompt Engineering · RAG · REST APIs & webhooks

Machine Learning: CNNs (image classification & OCR) · TensorFlow · PyTorch · Forecasting (Prophet, LightGBM, SARIMAX) · Google Colab

AI-Assisted Development: Python & JavaScript — AI-assisted, production-deployed · Claude Code · Lovable · GitHub · VS Code

Data & Analytics: SQL · Tableau · Looker Studio · Google Apps Script · Excel (advanced)

EDUCATION

Bachelor's Degree in Industrial Organization Engineering · [Universidad Rey Juan Carlos \(URJC\), Madrid](#) · Sep 2021 – Oct 2026

GPA 7.71/10 · Honors Distinctions · Expected graduation October 2026 (thesis pending)

Software Engineering — First year completed · [Universidad Politécnica de Madrid](#) · Sep 2020 – May 2021

CERTIFICATIONS & LEARNING PATH

Machine Learning Specialization — [DeepLearning.AI & Stanford University](#) Feb 2026

Supervised Machine Learning · Advanced Learning Algorithms · Unsupervised Learning, Recommenders, Reinforcement Learning

Business for All — [Harvard Business School Publishing](#) Aug–Nov 2024

Tech Business Acceleration Program — [Spinout](#) Nov 2023–Nov 2024

In progress: Anthropic Academy — Claude API & Model Context Protocol · Microsoft Power Platform (PL-900)

LANGUAGES

French Native | **English** Professional (C1)

Spanish Native | **German** Beginner — actively learning

ADDITIONAL

National-Level Triathlete — Marlins Triathlon Club, Madrid

Interests — AI & Automation, Entrepreneurship, Music, Sports, Investing
